Dear

I am writing to acknowledge receipt of your email dated 20th July 2022 requesting information under the Freedom of Information Act (2000) regarding Diabetes Systems.

**The University Hospitals of North Midlands Trust is committed to the Freedom of Information Act 2000.**

**However, the NHS is facing unprecedented challenges relating to the coronavirus (COVID-19) pandemic at the current time. Understandably, our resources have been diverted to support our front-line colleagues who are working tremendously hard to provide care for our patients, and to those in need of our services.**

**We strive to be transparent and to work with an open culture. But at this time, whilst care of our patients and the safety of our staff takes precedent, it is likely that responses to some requests for information will be delayed. We apologise for this position in advance, and will endeavour to provide you with as much information as we can, as soon as we are able.**

**The Information Commissioners Office has recognised the current situation in the NHS.**

As of 1<sup>st</sup> November 2014 University Hospitals of North Midlands NHS Trust (UHM) manages two hospital sites – Royal Stoke University Hospital, and County Hospital (Stafford). Therefore the response below is for the two sites combined from that date where appropriate.

**Q1 I would like to make a Freedom of Information (FOI) request of University Hospitals of North Midlands with the following questions:**

**What IT system(s) do your diabetes clinicians and specialists use to manage the interactions with and care of diabetes patients, both within hospital and community settings?**

A1 See below:

- Iportal in the hospital setting – both sites
- EMIS in the community setting - County only
- Graphnet is used to access patient details from GP's when they are admitted to the hospital – both sites

**Q2 What IT system(s) do your diabetes clinicians and specialists use to view the full GP-owned medical records of diabetes patients?**

A2 Graphnet gives a limited view, we do not have access to full GP owned medical records

**Q3 What IT system(s) or other methods do your diabetes clinicians and specialists use to update diabetes patients' GP-owned medical records?**

A3 Medisec is the IT system used to communicate with GP practices; this is accessed by GP practices electronically. We do not update GP owned medical records this would be up to the GP to upload any correspondence.
