Dear

I am writing in response to your email dated 29th January 2020 requesting information under the Freedom of Information Act (2000) regarding venous thromboembolism treatment.

I can neither confirm nor deny whether the information you have requested is held by the Trust in its entirety. This is because the information requested in questions 3 and 4 is not held centrally, but may be recorded in individual health records. In order to confirm whether this information is held we would therefore have to individually access all individual health records within the Trust and extract the information where it is present. We therefore estimate that complying with your request is exempt under section 12 of the FOI Act: *cost of compliance is excessive*. The section 12 exemption applies when it is estimated a request will take in excess of 18 hours to complete. We estimate that accessing and reviewing all individual health records and then extracting relevant information would take longer than the 18 hours allowed for.

In addition to the section 12 exemption the Trust is also applying section 14 (1) exemption: *oppressive burden on the authority*

Under section 16 of the FOI Act we are required to provide requestors with advice and assistance where possible. We would therefore like to advise you that if your request is shortened to just questions 1 and 2 we are able to comply within the 18 hour time frame. In order to avoid delay to your response we have provided this below.

As of 1st November 2014 University Hospitals of North Midlands NHS Trust (UHNM) manages two hospital sites – Royal Stoke University Hospital, and County Hospital (Stafford). Therefore the response below is for the two sites combined from that date where appropriate.

Q1 Please can I request any information that is available for the below questions:

Does a specific venous thromboembolism protocol exist for your Trust?

If so:

- **What date was this protocol put into place**
- **When is it due for review**

A1 UHNM does have a specific venous thromboembolism protocol, which is available to clinicians on our intranet. This protocol is reviewed annually. Information is not held regarding when this protocol was out in place.

Q2 Is there a preferred Direct Oral Anticoagulant (DOAC) or are all utilised within the Trust for VTE

A2 All DOAC are used by clinicians in the Trust

Q3 How many patients have been treated for VTE with a DOAC in the last 12 months?

A3 Section 12 and 14 exemptions as detailed above

Q4 What volume of each DOAC was used to Treat VTE in this same time period?

A4 As answer 3

*Please note that any individuals identified do not give consent for their personal data to be processed for the purposes of direct marketing.
